PROFILE SUMMARY

Computer Science student with hands-on experience in AI-powered applications, full-stack development, game project, and digital editing. Strong problem-solver with modern technical skills, seeking opportunities to apply creativity and technology in real-world projects.

EDUCATION

B.E in Computer Science and Engineering   *September 2023 - Present*
Maharaja Institute of Technology Mysore

PROJECTS

Title	Description
SKYSMART - AI Flight Booking Platform	SkySmart is an AI-powered flight booking platform that helps users find the best and most affordable flights. It provides smart recommendations, price drop alerts, and an intuitive interface to make flight booking faster, easier, and more cost-effective.
COLLEGE NEWS PORTAL	Built a responsive college news and events portal with a Node/Express API and vanilla HTML/CSS/JS frontend, featuring search/filter, event details, and a role-based admin console for CRUD and registration approvals.
GEM REDEMPTION - A BATTLE ROYAL GAME	Developed a multiplayer battle royale game using the Core Game Engine, implementing real-time combat, weapon systems, and dynamic shrinking zones.Designed gameplay mechanics, level environments, and player interaction systems to create a competitive last-player-standing experience.Demonstrated strong skills in game logic, scripting, and multiplayer design through end-to-end development.
